Capstone project
Review

Reviewer: Hitham Rizeq
Reviewee : Jorge A Anzueto

Summary

Jorge showed me his project (birdman) and what is he working on , labeling images , training and testing the model.

I suggested Jorge find an easier way to do the screenshots instead of doing that manually and see a way he can do it automatically (through the motion if that is possible).

Also, keep working on the models so he can make the process better and try to improve them As much as he can since they building the project from scratch.
